

Dental Clinic Website

Developer Requirements & Feature Specification

Purpose: A professional medium-size dental clinic website—neither overly large nor too basic—focused on patient trust, treatment information, appointment enquiries and easy contact.

1. Recommended Website Pages

No.	Page	Required Content
1	Home	Hero section, Doctor/Clinic intro, Book Appointment CTA, treatments, why choose us, testimonials, gallery, contact/location
2	About Doctor	Doctor photo, qualification, experience, specialization, certifications and professional introduction.
3	Treatments	Treatment categories with individual details: Implants, Root Canal, Whitening, Braces/Aligners, Crowns/Bridges, Extraoral
4	Technology / Services	Dental equipment, Digital X-Ray, Digital Scanning, sterilization/safety and modern treatment approach.
5	Gallery / Before & After	Clinic photos, equipment and treatment result images. Use patient consent for before/after photos.
6	Testimonials	Patient reviews, ratings and optional Google Reviews link/embed.
7	Blog / Dental Tips	Oral-care tips, treatment education, brushing/flossing guides and FAQs.
8	Book Appointment	Name, phone, email, treatment, preferred date, preferred time and message.
9	Contact	Address, map, phone, WhatsApp, email, opening hours and contact form.

2. Core Features

Feature	Requirement
Online Appointment	Appointment request form with treatment, date and preferred time.
Click-to-Call	Phone number should be clickable on mobile.
WhatsApp	Floating WhatsApp/contact button with pre-filled enquiry message.
Google Maps	Clinic location map and directions.
Responsive Design	Fully responsive for mobile, tablet and desktop.
Testimonials	Review cards with patient name/initials and rating where permitted.
Gallery	Optimized clinic and treatment images with lightbox/gallery view.
SEO	Page titles, meta descriptions, heading structure, image alt text and clean URLs.
Security	HTTPS/SSL, secure forms, spam protection and server-side validation.
Performance	Compressed images, lazy loading, caching and fast page loading.

3. Appointment Form Fields

Required: Patient Name, Mobile Number, Email (optional if clinic prefers), Select Treatment, Preferred Date, Preferred Time, Message/Concern.

Validation: Required-field checks, valid phone/email format, date validation, spam protection, success/error message after submission.

4. Optional Admin / Premium Features

- Admin dashboard for managing appointment enquiries.

- Appointment status: New / Confirmed / Completed / Cancelled.
- Automated email or WhatsApp notification to clinic after enquiry.
- Automated appointment reminder (if an approved messaging service is integrated).
- Multiple-doctor support.
- Patient login/profile only if the clinic specifically requires it.
- Online consultation/payment only if required by the client.

5. Technical Requirements for Developer

- Use a clean, maintainable component-based structure.
- Frontend should be responsive and accessible.
- Forms must have both client-side and server-side validation.
- Do not expose private patient information in URLs or public pages.
- Use optimized WebP/AVIF images where appropriate.
- Add semantic HTML, proper H1-H3 hierarchy and descriptive alt text.
- Create sitemap.xml and robots.txt and configure basic SEO.
- Use HTTPS in production.
- Keep API keys/secrets in environment variables; never hard-code credentials.
- Add basic error logging and form submission monitoring.

6. Suggested User Flow

Home → Treatment → Treatment Detail → Book Appointment → Confirmation

Secondary flow: **Home → WhatsApp/Call** and **Home → Contact → Google Maps**.

7. Important Client Content Needed

- Doctor name, qualification, specialization and professional photo.
- Clinic name, address, phone, WhatsApp, email and opening hours.
- Final treatment/service list and descriptions.
- Clinic logo and preferred colors.
- Real clinic/equipment photos.
- Patient testimonials and before/after images only with appropriate permission/consent.
- Social media links, if required.

8. Recommended Scope

Best medium-size package: 8–9 pages + responsive UI + appointment enquiry form + WhatsApp + click-to-call + Google Maps + testimonials + gallery + basic SEO + security/performance optimization. Admin dashboard and automated reminders can be added as an optional phase.
